

How Much Do You Know? Test Yourself!

World and US Geography

Compiled by Olen Soifer, January 30, 2007

1. Highest High Places:

- A. What is the tallest mountain in the World? _____
1. What country is it in? _____
2. How tall is it? (To the nearest 1,000 feet) _____
- B. What is the tallest mountain in the 50 United States? _____
1. What state is it in? _____
2. How tall is it? (To the nearest 1,000 feet) _____
- C. What is the tallest mountain in the "lower 48 states"? _____
1. What state is it in? _____
2. How tall is it? (To the nearest 1,000 feet) _____
- D. What is the highest place in New Jersey? _____
1. What county is it in? _____
2. How high is it? (To the nearest 100 feet) _____

2. Lowest Low Places:

- A. What is the lowest place in the World that is not covered by ice? _____
1. What country is it in? _____
2. How low is it? (To the nearest 1,000 feet) _____
- B. What is the lowest place in the United States? _____
1. What state is it in? _____
2. How low is it? (To the nearest 100 feet) _____
- C. Two of the United States have places that are below sea level. Can you name the places and the states? _____
- D. Name the deepest canyon in the US and the state it is in?:

3. Land Areas and places

- A. Can you name the seven continents? _____
_____ Circle the continent that has only one country on it. Put a star next to the two continents that are connected to each other.
- B. 5 countries in the world, including the United States, contain more than 3 million square miles each. Can you name them and number them in order of size? _____

- C. What is considered to be the smallest independent country? _____
- D. What is considered to be the largest island in the world? _____
- E. What is the largest state in the 50 United States? _____ What is the largest state in the "lower" 48 states? _____ What is the smallest state? _____
- F. Can you name the 1 New England state that does not touch the ocean? _____
- G. There is only one place in the United States where 4 states touch at one point. Can you name the four states? _____
- H. There are two United States that do not touch any another state. Can you name them?

- I. What is further east... Maine, or Alaska?
- J. What is further west... Alaska or Hawaii?

4. The Waters of the Earth

- A. There are 4 main oceans in the world. Can you name them? _____
_____ Circle the largest one
- B. The two longest rivers in the world are very close to each other in length. Name them; list the continent one each is on and what body of water each one flows into:

Circle the longer of the two rivers.
- C. What is the longest river in the United States? _____ What state does it start in?
_____ In what state does it end? _____
- D. Can you name the 5 Great Lakes?

Circle the biggest one. Put a star next to the one that is completely in the United States.
- E. Name a river, a bay and a state near us all with the same name? _____
- F. What is the biggest lake in New Jersey? _____

- G. Most rivers in the United States flow east, west or south. Can you name two rivers that flow north into Canada? _____
- H. Can you: Name the tallest waterfall in the world; give the country in which it is located; and give its height? _____
- I. What is the tallest waterfall in New Jersey & how tall is it? _____

5. People and Places

- A. Can you name the world's 3 most populated countries, largest first? _____

- B. Can you name the world's 3 most populated cities, largest first? _____

- C. What is the world's population (to the nearest 100 million)? _____
- D. What is the population of the US (to the nearest 10 million)? _____
- E. What is the population of New Jersey (to the nearest 100,000)? _____
- F. What is the most populated city in New Jersey? _____
