(CUT ABOVE LINE)

**How to make and frame our sign:**

First color the letters dark green and color all of the rest of the gray parts dark brown. Then fill in the blank areas, inside the thick border, with tan or light brown. After you have colored the sign, cut away these instructions and glue the picture to a piece of thick cardboard. Finally, pull off the "petals" from some big pinecones and glue on for a border, or you can glue on whole pinecones if you use small ones and pull off the petals on one side so they lay flat on the paper.
